

**NYU Sackler Programing Club**

**Special Event:**  
**NIH ImageJ Tutorial and Macro Programing**

**Monday, November 4, 2013**

**7:00 – 9:00 PM**

**Skirball 3<sup>rd</sup> Floor Conference Room**

**Michael Cammer**

***Presenter***

***Assistant Research Scientist. OCS Microscopy Core***

**“Automating Image Analysis in NIH  
ImageJ using Macros Recording  
and Loops”**

**Brief Synopsis:** ImageJ is a powerful open source software platform that contains a broad range of image analysis tools. Complex image analysis requires repetitive application of routine tasks, and productivity can be greatly enhanced by learning the basics of macro creation.

**Please bring a laptop with ImageJ  
installed to take full advantage of the  
class**
